Art Unit: 1755

Applicant's election without traverse of group I, claims 1-11, the species comprising rosin esters and flax oil (linseed oil) in the reply filed on 16 November 2006 is acknowledged. Claims 6-7 are withdrawn from consideration as directed to nonelected species.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by US 2749247.

The reference is representative of a large body of art teaching coating compositions having similar composition to the binder of the instant claims. US 5427615, 5762696, 2550961, 2357016 and 2343021 are cited as of interest as further examples of this body of art. While the patent does not disclose the binder for the same intended use, it teaches compositions having the same

Art Unit: 1755

ingredients in proportions falling within the scope of the instant claims. As a materials properties are inseparable from that material, it would be expected that the compositions of the reference would exhibit all the properties recited in the instant claims. No evidence to the contrary is of record.

Example IV of the reference teaches a composition comprising 60% linseed (flax) oil (viscosity about 30 Pa.s) and 40% rosin ester (boiling point about 120 C) with cobalt linoleate added as a drier (catalyst).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 2749247 in view of Barnes et al.

The difference between the patent example and the instant claim 11 is the anion of the cobalt salt. Page 16 of the Barnes et al reference teaches the octanoate salt of cobalt is a useful drier for drying oils in addition to the linoleate salt of the patent. It would have been obvious to one of ordinary skill in the art to substitute cobalt octanoate as the drier in the patent example because Barnes et al teach it is useful as such.

It is noted that Example 3 US 5021476 anticipates nonelected species of the instant claims.
